

## Get Notified on Public Cloud Incidents right into your Mobile Devices!

TalariaX is pleased to announce the official launch of sendQuick onCloud!

sendQuick onCloud is a systems availability monitoring and notification management platform for the cloud. It works with public cloud services to monitor systems, applications, services and network and flags up issues to your IT staff.

Send notifications on critical issues directly to your designated teams so that they can address incidents quickly and efficiently. We offer the perfect solution for your IT monitoring services.
